PROBLEM STATEMENT :

Customizable Subscription Box Scheduler

1.REQUIREMENTS TABLE

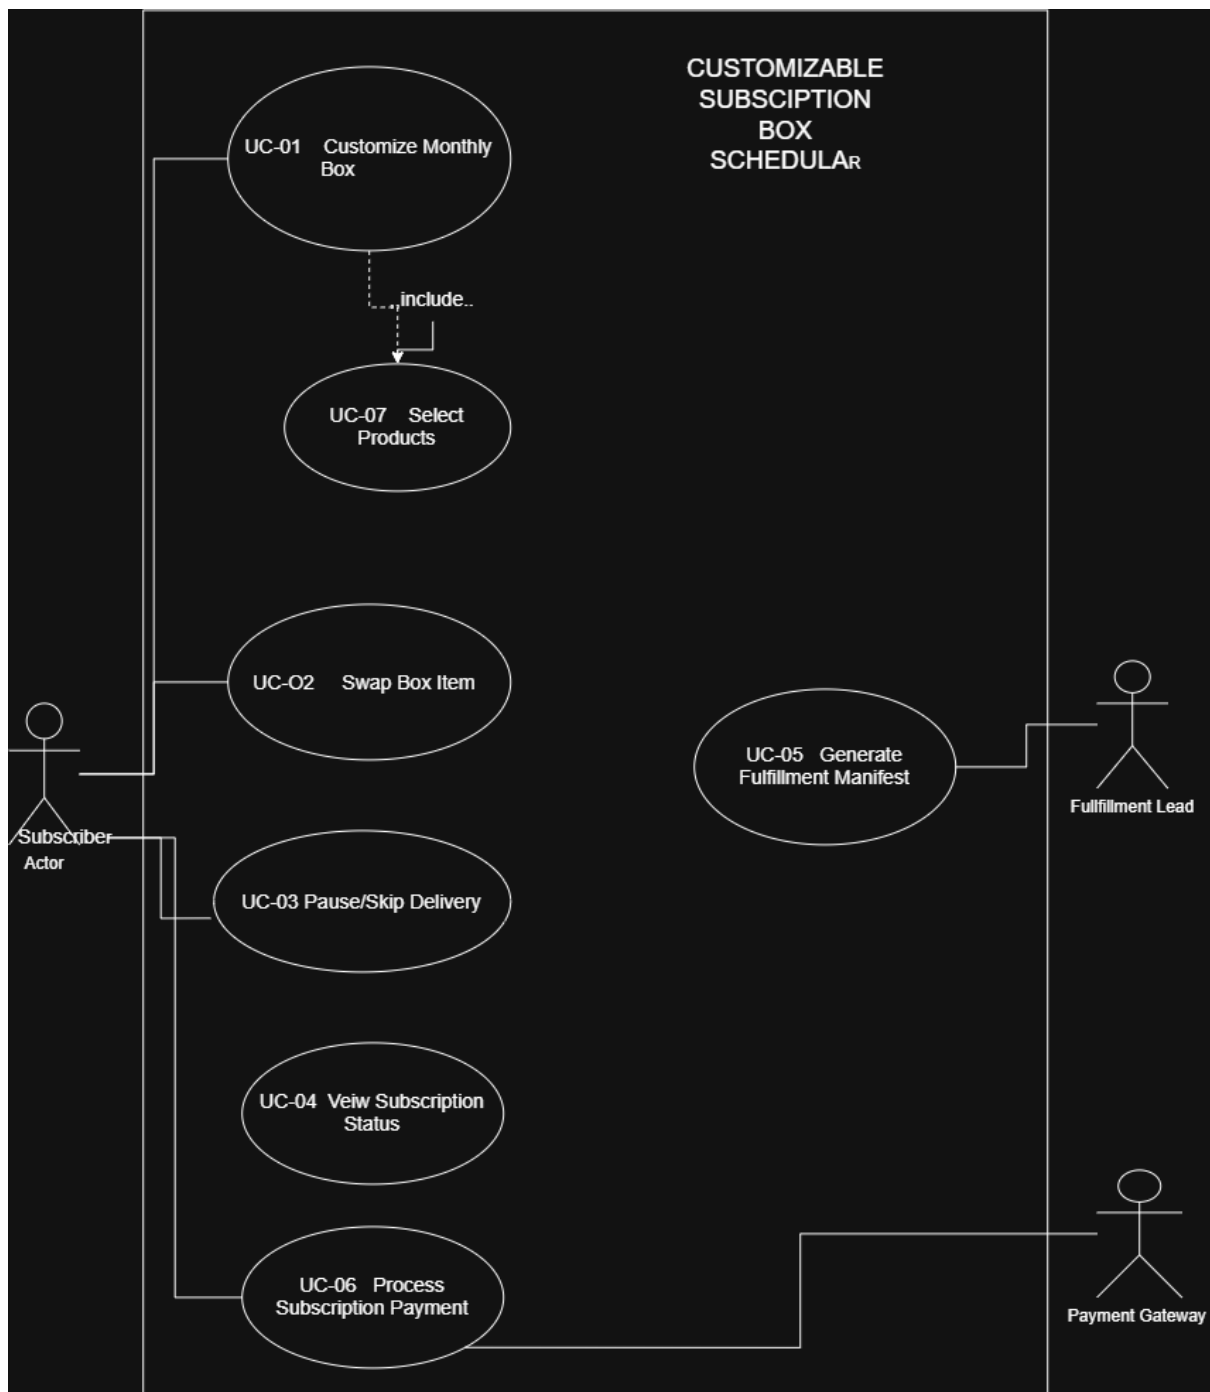

Req ID	Type	Description	Priority	Acceptance Criteria	Rationale	COMMENTS
FR-001	Functional	The system shall allow subscribers to swap monthly box items or pause deliveries up to 48 hours prior to the monthly billing renewal date.	High	Pass if the subscriber can swap an item or pause delivery before the 48-hour deadline and the updated subscription is	Core subscription customization functionality.	Verify the 48-hour deadline is enforced.

				displayed.		
FR-002	Functional	The system shall allow subscribers to select products for their monthly box based on preference	High	Pass if selecting a preference tag displays matching products that the subscriber can select.	Enables personalized subscription boxes.	Specify the available preference tags.
FR-003	Functional	The system shall allow subscribers to view the selected box items and scheduled delivery date before confirming the monthly box.	High	Pass if all selected items and the scheduled delivery date are displayed before confirmation.	Helps subscribers verify their customized box.	Ensure all selected items are displayed correctly.
FR-004	Functional	The system shall allow subscribers to	Medium	Pass if the system	Helps subscribers	Clarify the information

		view their subscription status, including active, paused, skipped, and upcoming deliveries		displays the current subscription status and next scheduled delivery correctly .	track their subscription.	on shown for each status.
FR-005	Functional	The system shall allow the fulfillment lead to generate a fulfillment manifest containing the products and delivery details for scheduled boxes.	High	Pass if the fulfillment lead can generate a manifest containing all boxes scheduled for fulfillment.	Supports efficient box preparation and delivery .	Specify the required fields in the manifest.

NFR-001	Nonfunctional.	The fulfillment manifest generator must export shipping labels for 10,000 monthly boxes in under 1 minute.	High	Pass if 10,000 shipping labels are exported in less than 60 seconds during benchmark testing.	Ensures efficient fulfillment during high-volume periods.	Verify performance under peak load.
NFR-002	Nonfunctional.	The system shall require authenticated access to subscriber account and subscription information.	High	Pass if an unauthenticated user is prevented from accessing subscriber or subscription details.	Protect subscriber information.	Specify the authentication mechanism.

2. USE – CASE DIAGRAM

3. USE – CASE FLOW

Lab 1 – Use-Case Flow

Use Case: UC-01 – Customize Monthly Box	
Actor:	Subscriber
Goal:	To customize the monthly subscription box by selecting products based on preference tags.
Preconditions:	Subscriber is registered and logged in to the system.
Trigger:	Subscriber chooses to customize the upcoming monthly box.

1. Main Success Scenario

1. **Subscriber** logs into the subscription box portal.
2. **Subscriber** selects “Customize Monthly Box.”
3. **System** displays the subscriber’s preference tags.
4. **Subscriber** selects one or more preference tags.
5. **System** displays products matching the **selected** preference tags.
6. **Subscriber** selects the desired products for the monthly box.
7. **System** validates the selected products.
8. **System** displays the customized box summary and scheduled delivery date.
9. **Subscriber** confirms the customized box.
10. **System** saves the selected products.
11. **System** updates the subscriber’s upcoming subscription.
12. **System** displays a confirmation message.
13. Use case ends successfully.

2. Alternate Flow

6a. Selected Product Unavailable

1. **System** detects that a selected product is unavailable.
2. **System** displays an “Item Unavailable” message.
3. **System** suggests available products matching the subscriber’s preferences.
4. **Subscriber** selects an alternative product.
5. **System** updates the customized box with the alternative product.
6. The flow continues from Step 7 of the Main Success Scenario.

Postconditions: The selected products are saved and the upcoming subscription is updated.
